Alaska Canned Salmon

Sockeye (Red) Salmon *Oncorhynchus nerka*
 Chum (Keta) Salmon *Oncorhynchus keta*

Alaska is recognized the world over as the greatest resource for wild, natural salmon. This state is home to five salmon species – king, sockeye, coho, pink, and chum – each with its own unique characteristics. All Alaska salmon begin their life in the freshwater streams and rivers, then move downriver to the ocean where they mature. Depending on the species, they spend one to five years in the ocean, feeding on a diet of krill, shrimp, small fish, and plankton. When the time is right, these true athletes of the ocean make the long journey back to the exact stream or river of their birth to spawn.

As the fish return, government resource managers count them and make sure enough fish are present to provide a continued healthy resource. Only after sufficient numbers of fish have returned can harvesting begin. The fishing process is strictly regulated: A limited number of boats are allowed to fish; fishing areas are limited; and gear must meet all state regulations. These management practices ensure that Alaska will maintain an abundant and sustainable natural resource of salmon for generations to come.

North Pacific Seafoods canned salmon offers a convenient and economical way to add the nutritional benefits of Alaska wild salmon to a wide variety of applications.

Product Specifications

With processing facilities in the major salmon producing areas of Alaska, North Pacific Seafood is a leading producer of fresh, frozen and canned salmon. We offer canned sockeye and chum salmon, in three can sizes, to markets worldwide. All products are SPA and FDA inspected to ensure their high quality and safety, and all plants are operated under strict HACCP, SPA and FDA guidelines. Additionally, our canned salmon is produced in plants and under processes that are audited to the strict standards of the U.S.D.C. and the BRC Global Standard for Food Safety. Our entire canned salmon production is certified as being from a sustainable fishery and is approved for Kosher labeling.
